

/home/runner/work/EBGeometry
/EBGeometry/Source/EBGeometry
_DCEL.hpp

```
graph TD; A["/home/runner/work/EBGeometry  
/EBGeometry/Source/EBGeometry  
_DCEL.hpp"] --> B["EBGeometry_NamespaceHeader.hpp"]; A --> C["EBGeometry_NamespaceFooter.hpp"];
```

The diagram illustrates a file path structure. At the top, a grey rectangular box contains the path: `/home/runner/work/EBGeometry`, `/EBGeometry/Source/EBGeometry`, and `_DCEL.hpp`. Two blue arrows originate from the bottom of this box. The left arrow points to a white rectangular box containing `EBGeometry_NamespaceHeader.hpp`. The right arrow points to another white rectangular box containing `EBGeometry_NamespaceFooter.hpp`.

EBGeometry_NamespaceHeader.hpp

EBGeometry_NamespaceFooter.hpp
