

TransformOp< T >

```
graph BT; TranslateOp[TranslateOp< T >] --> TransformOp[TransformOp< T >];
```

The diagram illustrates a relationship between two classes. At the bottom is a gray-shaded box labeled 'TranslateOp< T >'. A blue arrow points vertically upwards from the center of this box to the center of a white box labeled 'TransformOp< T >' at the top. This indicates that 'TranslateOp< T >' inherits from or is a specialization of 'TransformOp< T >'.
